CIT 140 · Week 5 | Current Appointment Process

Replace this line with your process start and end. Add supported steps and decisions in the responsible role's lane. Label decision branches and source IDs.

Symbol key (copy these shapes into your lanes; they are not case steps)

Week 5 | Scope and Findings

1 · Process scope

Christian Calkins

Process Start: The process begins when a visitor submits an appointment request containing their preferences and required accommodation details (W05-S01).

Process End: The process ends when the next staff team receives the visitor at arrival with all necessary clinical and accommodation arrangements verified (W05-S03).

2 · Check the two paths

Incident Sequence: Request received → confirmation issued to visitor → visitor arrives → status checked as HELD → exception review triggered (W05-S04).

Root Cause Disconnect: A confirmation message was dispatched to the visitor before Clinical Operations completed their evaluation of room and clinician availability (W05-S01, W05-S04).

3 · Evidence and model review

- **Visitor:** Initiates appointment requests and receives booking confirmation details (W05-S01).
- **Scheduling (Mateo Silva):** Logs request details, verifies request completeness, issues booking messages, and routes requests for clinical evaluation (W05-S01).
- **Clinical Operations (Dr. Lena Okafor):** Checks clinician and room availability, setting readiness status to Ready or Retaining Held status (W05-S02).
- **Intake (Dana Ruiz):** Reads queue status upon visitor arrival, completing handovers for Ready cases or escalating Held cases to exception review (W05-S03).

4 · Learning reflection (reuse your Discord paragraph)

As I modeled the process, I found that the information that we need to gather came to me in a way that was easy to understand. I found that in W05-S04 there was a lack of communication that resulted in a lapse of information. As I completed the assignment, I thought it was way more engaging than the Week 04 assignment because it involved drawing up the path.

5 · Portfolio evidence

[Editable model filename and Week05/Evidence/Week05_Discord_Post.png or .jpg. If Discord is unavailable, identify the equivalent reflection used here.]
Save the .drawio file; export both pages as one PDF; check readability; commit and push.
